

**Frozen Semen Addendum for Equine Veterinary Services Breeding Contract**

An additional \$500 Frozen Semen charge is due prior to shipping Frozen Semen doses to any mare owner. This fee guarantees up to four doses in an effort to successfully get the contracted mare in foal. The Frozen Semen is only for use on the contracted mare, unless other arrangements have been made in writing with an Equine Veterinary Services representative. Unlawful use of Frozen Semen from Equine Veterinary Services will not be tolerated. If more semen is required, an additional \$500 will be charged for up to four additional doses.

The cost of International Frozen Semen Shipping is the expense of the mare owner. This expense may be split between multiple mare owners, however, must be paid prior to the Frozen Semen leaving the breeding facility of Equine Veterinary Services.

All fees are payable to Equine Veterinary Services prior to any Frozen Semen shipments being made.
